Preface

In clinical practice, history taking and examination are the first steps in making diagnosis. The diagnosis making is most important task which required history, examination and investigations findings. A book was required on clinical methods which will help students to understand how to examine a patient and interpretation of findings in making diagnosis. For MBBS students, it is tough task to understand the clinical finding in ear, nose and throat and head neck. Theoretical knowledge and clinical picture can help him to understand the findings of examination.

Otorhinolaryngology and head neck surgery has changed a lot in last few decades. With the advent of newer diagnostic methods, surgical procedure and surgical equipment. This book included clinical aspect of ENT & HNS to help students in Interpretation of history and examination findings to make diagnosis and also explains how to take proper history and performs the examination. This is first edition has fourteen chapters which includes history taking, general examination, systemic examination and differential diagnosis. This book starts with general history taking and general examination and also included how to performs examination with list of probable diagnosis. It is anticipated that this Clinical ENT & head neck surgery will provide immediate access to necessary detail information on diagnosis making in otolaryngology and head Neck surgery. This book has included all aspect to decreasing the amount of time spent on searching for needed information. With that goal in mind, this book is well organized, follows an established format, is thoroughly indexed, and in all areas is focused on providing detail information that is likely to be clinically most useful. It is hoped that this book will serve students (UG and PG) to the benefit of the patient. This standard organization was chosen to allow the user to review a subject in the typical pragmatic manner in which one approaches a clinical problem. Furthermore, the fact that each chapter follows this same outline should enable the reader to become comfortable finding necessary subjects rapidly. When applicable, tables and images are also used to present and organize key information. The extensive index has been thoughtfully planned to as a quick and easy reference. We are confident that this book will serve clinicians well.

This book has been created for undergraduate students to understand clinical examination and interpretation of examination in making diagnosis and also students who are planning for NEXT/ NEET PG, FMGE, Postgraduate students. We will be pleased to received comments and suggestion for improved second edition at sushiled20@gmail.com.

Prof. Dr. S. K. Kashyap

Acknowledgement

In completion of this assignment, I had to take the help and guidance of some respected persons., who deserve my deepest gratitude. As the completion of this assignment gave me much pleasure. First and foremost, I would like to praises and thanks to my Godfather (Dr. B. R. Ambedkar, Father of constitution of India) and my parents for their efforts made in past, showers of blessings from heaven throughout.

I would like to show my special gratitude to my elder brother Mr. Rakesh Kashyap for his untiring encouragement throughout my life and during this project. His dynamism, vision, sincerity and motivation have deeply inspired me. Dr. Sharmistha Kashyap who help me all way during authoring this book. I would like thanks all my friends Dr. Nutan Agarwal, Dr. Kuldip Chandel, Dr. Neeraj Srivastava and Dr. Madurmay helped in preparing the topic on general and systemic examination of this book.

I would like to thank my wife Dr. Sharmistha Kashyap for giving me a good support for throughout this assignment. She stood by me during every struggle and all my success. She helped me a lot in gathering information, collecting data despite her busy schedules.

I would like to express my thanks to all my teachers and special regards to Dr. Sunil Saxena, Professor and Head, Department ENT & Head Neck Surgery, JIPMER, Pondicherry India. It was great privileged and honor to work and study under his guidance. None of this would have been possible without my past students who inspired me to write this book on clinical methods in Otorhinolaryngology and Head Neck surgery. I would also like to expand my gratitude to all those who have directly and indirectly helped me in writing this book. Many people, especially my Friends have made valuable comment and suggestions on this book which gave me an inspiration to improve the quality and contents. I would like to say thanks to my friends and contributors, for their constant encouragement and support.

Dr. S. K. Kashyap
