PREFACE

This is the collection of technical terms being used in the field of Electrical and Communication Engineering.

These terms and the explanations are made to meet the understanding of undergraduate of engineering students.

I made two types of this book, that is one book with totally English scripts and another one book with English and Tamil scripting.

The ultimate purpose is to improve the language skill of the engineering students.

I hope this will be useful for the students as well as for all those involved in the learning and teaching of engineering education.

Author

Er. G. Akalya M.E

Assistant Professor of ECE.
