# Preface

Knowing the language and the related technical terms is basic tools needed for learning of any science.

It is true that every science is having the special basic information and the understanding of this will favor the better understanding of the main science.

In this view I suggest everyone to learn the language and the technical terms before going for the scientific topics reading.

Otherwise a text book makes the reading and the technical terms book make the learning.

This book is prepared with an aim to achieve all the aspects of medical education.

I believe this book will do favour of all those in the way of reading learning and teaching of medical education

This is a collection of technical terms used in neurology clinical topics classes and discussion.

Learning the language and the related technical terms will lead us to the understanding the core of the neurology topics.

Language is the first tool for the learning science.

This book is made with aim to help to achieve these requirements.

No scientific learning is possible without knowing the related technical terms.

This book is made with aim to help to achieve these requirements.
