Preface

This book on Python Programming will introduce you to the fundamentals of Python as a language. It's aimed for learners who want to add python as a skillset into your list of programming languages. Python is a programming language that is in wide use both for professional software development and in education. In the technical world, it is used for from creating small scripts to developing full web applications such as YouTube, SnapChat and DropBox.

It's an unrushed introduction, taking small steps from the basics to more varied advanced topics. Even though this is an introduction, some topics that might seem advanced has also been included, such as Numpy basics, Scope and modules in Python Language. We have also included many examples for understanding especially if you've programmed in other languages and try to adapt those styles to Python.

In this book, we have constructively raised the fundamentals of Programming and then understanding fundamentals of Python with all the necessary concepts.

The Chapter 1, Introduction to programming is elaborating the concepts regarding Algorithms, Flowcharts, and various programming languages. You will also come across concepts pf compilation, testing and debugging and models of computation in python programming.

In Chapter 2 you will learn how to use Algorithms ad flowcharts in solving problems, tools to create the flowcharts, along with examples to using Algorithms and flowcharts.

In Chapter 3, you will learn technical strengths of python, its interpreter, Python working modes, Variables, constants, Data types and the complete installation process of python. Along with this you will learn concepts of slicing, accepting inputs in python through console and concatenation.

In Chapter 4, you will come across the various types of operators used in python programming, alongside Operator precedence, Conditional Statements in Python and different loops available in python programming.

In Chapter 5, we will discuss Sequence Data types in python which will include topics other than Data Types, such as Lists, Tuples and Dictionaries with their detailed properties and usages. And it will also cover concepts of Mutability in python with many examples in python programming using such sequence data types.

In Chapter 6, you will understand the Top down Approach in Problem Solving, Modular Programming and Functions Parameters, Local Variables, the Return Statement, Global Statement, Library Function, String Function and Recursion.

In Chapter 7, you will come across the concepts of Files and you will have the Understanding in File Handling, various python functions for reading from a file and writing into a file.

In Chapter 8, you will learn about Scope of Objects and Names, LEGB Rule, Module Files as Namespace, Types of Modules, Import Model and Reloading Modules. Finally, you will understand Python Standard Modules in detail.

In Chapter 9, we will take you through the Introduction to Numpy, array, datatypes, array Attributes, Array Creation Routines, Array from Existing Data and concepts of Indexing & Slicing.

Acknowledgement

First and foremost, we are grateful to all the contributing authors for their time, effort, and understanding during the preparation of the book. This book is the outcome of constructive and comprehensive efforts of all the authors. All chapters were reviewed and authors have updated their chapters to address review comments.

Binu K.Vargis would like to thank his family members, especially Mrs. Gracy Vargis (Mother), Mr. K .K. Vargis (Father) and Ms. Jesly John (Wife) for their immense love, understanding, and support extended during the preparation of this book. Last but not the least he would also like to thank Dr. Kamal Upreti for his enthusiastic support and guidance during the preparation of the book and enabling us to easily navigate through processing of this book.

In the end we are extremely grateful to INSC International Publishers for the sustained efforts in completing this work.

(Mr. Binu K. Vargis)

Contents

Chapter 1	Introduction to Programming (प्रोग्रामिंग का परिचय)	1 - 17
Chapter 2	Controlled System and its Connections (प्रश्नों को हल करने के लिए एल्गोरिदम और फ्लोचार्ट)	18 – 29
Chapter 3	Introduction to Python Programming (पायथन प्रोग्रामिंग का परिचय)	30 – 96
Chapter 4	Operators, Expressions and Statements in Python (पायथन में ऑपरेटर्स, एक्सप्रेशंस और स्टेटमेंट्स)	97 - 134
Chapter 5	Sequence Data Types (सीक्वेंस डेटा टाइप्स)	135 – 187
Chapter 6	Functions- User Defined & Built In Function (फंक्शन्स – उपयोगकर्ता परिभाषित और निखमत फंक्शन्स)	188 – 249
Chapter 7	File Processing (फ़ाइल प्रोसेसिंग)	250 – 265
Chapter 8	Scope And Modules In Python Language (पायथन भाषा में स्कोप और मॉड्यूल)	266 – 293
Chapter 9	Numpy Basics (Numpy मूल बातें)	294 – 325

About Authors

Mr. Binu Kuriakose Vargis working as an Assistant Professor in Department of Information & Technology, Inderprastha Engineering College (Ghaziabad), Affiliated to Abdul Kalam Technical University (AKTU), India. He has a rich 8 years of experience in Academics and Research, in which he guided students in many projects and research areas. He crowned his Masters in Computer Science and Engineering from Lovely Professional University, Punjab, India. He was an aberrant academician. During his Bachelors in Engineering (Honors) from University of Rajasthan and was awarded with Best Academic Student He is also a zealous Research Scholar and has few many Patents (Indian and Australian) and Research papers in Quality Peer Reviewed Journals. His Research Areas includes Artificial Intelligence, Honeypot Security, Data Science, Statistics, Data Analytics, Blockchain Security, Cloud Computing and Supply-Cold Chain management system.

Mr. Rituraj Jain is working as a Lecturer in Department of Electrical & Computer Engineering at Wollega University, Nekemte – Ethiopia since 2015. He has total 18 years of teaching experience in different colleges and universities. He has published Indian and International patents and number of research papers in international journal as well as presented at international conferences. His areas of interest include Machine Learning, Cloud Computing, Design and Analysis of Algorithms, Software Engineering.

Mr. Vaibhav Sharma is Working as an Assistant Professor in School of Computer Application & Information Technology at SGRR University Dehradun, India since 2013. He has total 11+ years of teaching experience in various Institutes and University. He has qualified UGC NET and USET. He is pursuing his PhD in Computer Science. He has presented and published some papers in national and international journals and conferences. He has also participated in many national and international conferences, workshops, webinars, FDP, STC etc. His areas of interest include Programming in C, C# With .Net Framework, RDBMS, Design and Analysis of Algorithms, Python, IOT etc.

Dr. Meena Agrawal is currently working as an Assistant Professor in Energy Center, Maulana Azad National Institute of Technology, Bhopal, India. She is B. E (Electrical Engineering), M. Tech (Power Electronics), and PhD in Energy. She has published over 30 patents, books and research papers in various reputed international conferences and journals. She has rich teaching experience of more than 25 years to engineering students. For four Years, she has contributed as Head Electrical Engg. Dept. in Rwanda in Africa, with Best Teacher felicitation. Her areas of interest and specialization are Power Electronics, Renewable Energy Hybrid Systems, Smart Grid, and Multi-Agent Systems.

Dr. Rahul Singhai is affiliated to International Institute of Professional Studies (IIPS), Devi Ahilya University, Indore (M.P.), India where he is currently working as Assistant Professor (Senior Grade). He had received his Ph.D. degree in the core area of Data Mining from Department of Computer Sc & App, Dr. Hari Singh Gour Central University, Sagar (M.P.). He has authored and co-authored several national and international publications and also working as a reviewer for reputed professional journals. He is having an active association with different societies and academies around the world. He has received grant for 3 patents in the different area of computer science. His major research interest involves Data Mining, Operating System, DBMS, Computer Network & Cloud Computing.
